The Absolutely English Progress Development Reference System

Based on “can do”. Each competence is described with just a few words. Recording progress consists of indicating with colour lines the level attained. At any time the record can be updated. Time-saving and easy to use and interpret. Includes Excel tables for the rapid determination of grades (Noten).

Along with the Creative Portfolio it provides an ideal situation for reflection and analysis for all – children, guides, parents. Children and guides are thus equipped and able to exercise choice and make day-to-day decisions about their learning programme.
